

COMPANY PROFILE

MOSIMA
IT SOLUTIONS

ADVANCING SOCIAL DEVELOPMENT THROUGH TECHNOLOGY

1 Overview

Mosima IT Solutions provides a comprehensive range of IT services to manage and maintain your ICT infrastructure at optimum levels. We have dedicated professionals that can help design and implement your technology needs. Our experience and extensive knowledge of systems software and integrated hardware, allows us to implement tailored solutions that are efficient and cost effective. Mosima IT Solutions was established in 2006 to provide information technology solutions for small to medium sized businesses and government entities. We are a technology intensive corporation geared to deliver state-of-the-art solutions in areas of integrated business solutions, system applications, product development, enterprise storage and communication & network management services.

Mosima IT Solutions provides clients with a comprehensive range of professional solutions including Infrastructure consultancy, project and programme management, custom software development and enterprise architecture consulting. We strive to deliver rapid, reliable and robust information technology solutions that work. Since inception our mission has been to develop partnerships with clients to provide effective and reliable information technology solutions that provide operational efficiency, productivity gains and cost savings to our clients. Owned and managed by Victor Mosimanegape Motaung, a seasoned IT professional with 21 years' experience. Victor has been with the company from inception, having started alone, to a full staff complement of IT Engineers, Software Developers, Network and Cabling Technicians, Management Consultants, Virtualisation and Enterprise Infrastructure Specialists and a seasoned Project and Programme Manager.

2 About Us

Mosima IT Solutions started operating in 2006. The company initially operated exclusively in the web development and e-commerce space and quickly grew to offer a range of solutions in the Information Communications and Technology space. Social development is a strong part of Mosima IT Solutions' make up. Our intentions are to make technology & science a career of choice among previously disadvantaged youth. We have over the years established a strong network of professionals in the ICT industry and continue to offer our employees opportunities for growth and continuous development. Mosima IT Solutions will give committed and hardworking individuals and opportunity to become role players in the ever changing ICT industry. We plan to act as an incubator, assisting government and the private sector in addressing the skills shortage in the technology industry. We have to date developed a few young ICT graduates who went on to pursue their careers with Universities and JSE listed companies. We have also focused on employing more female staff to be more representative of our society.

Vision

To use information and communications technology tool for social and economic transformation.

Tagline

"Advancing Social Development Through Technology"

Employment Equity

We don't only employ skilled graduates but those without the skills and qualifications but have hunger and passion will also be considered as part of our team.

Management Control

100% Black Directorship

Preferential Procurement

Where possible we always try and procure our products and services from black owned companies. We also prefer to use black consultants as a means to "share the pie".

3 Leadership

As Managing Director, Victor Motaung has successfully guided the company to become one of the leading black owned and managed ICT Solutions company in South Africa. Mr Motaung, a seasoned IT Professional started Mosima IT Solutions in 2006. He is the brains behind the company and has since setup Mosima Holdings, a diversified group of companies with a focus in Infrastructure and Construction, Security Technology Solutions, Printing & Signage.

- Veeam – VSP

6. Quality Management System

A quality management system (QMS) is a collection of business processes focused on consistently meeting customer requirements and enhancing their satisfaction. It is expressed as the organizational goals and aspirations, policies, processes, documented information and resources needed to implement and maintain it. Mosima IT Solutions undertook a full Quality Management System conducted by Tiso-SHEQ Solutions. The audit was QMS compliance services to the standard of ISO 9001:2015 QMS. Referencing legislation which applies, including National ACTS, Legislation and National and Municipal Bylaws are obtained, referenced and included in all processes and procedures. Lead Auditors from TISO were intricately involved in project execution and the internal processes needed to ensure that Quality Services are rendered by Mosima IT Solutions to our clients throughout the course of any current and future projects we undertake.

7 Products & Services

Mosima IT Solutions is a full-service technology company. We specialize in delivering consulting, infrastructure, and software development solutions that increase productivity, competitiveness and deliver cost savings. Our success is founded on professionalism, integrity and exceptional client service delivering the highest standard of solutions tailored to your technology needs and objectives. Our team are specialists in providing solutions to Government and SMME sector businesses, Our specialist business units in the Infrastructure and Development sectors are focused on delivering affordable and proven solutions to these sectors.

13. We provide a complete range of IT products backed up with excellent after sales support and customer care and training:

PCs and Mobile Devices	Servers & Storage	Printers & Projectors
Maintenance Services Contracts	Software accessories & Peripherals	

14. VOIP/IPBX Telephony Systems

3CX is a software based PBX that works with SIP standard based IP Phones, SIP trunks and VoIP Gateways to provide a full PBX solution – without the inflated cost and management headaches of an 'old style' PBX. Used by more than 30,000 companies globally, 3CX has been recognized for its innovation.

Take your Extension Anywhere

3CX includes clients for smartphones and Mac or Windows laptops that allow users to use their office extension from anywhere, seamlessly integrated as if they were in the office. Not only are all calls to the office free of charge, but employees can leverage

one single number and make a professional impression. Mosima IT Solutions is an authorized partner of 3CX solutions through ICT Globe, the only official 3CX distributor on the African continent. We are also accredited with the following OEMs for Unified Communications:

Huawei	MTN	Yealink
Alcatel Lucent	Cisco	

15. Cyber Security

Defined as the protection of data, networks and systems, Cyber Security is a critical issue for Industry and Government. Almost every business relies on the confidentiality, integrity and availability of its data. cybersecurity or information technology security is the protection of computer systems from the theft of or damage to their hardware, software, or electronic data, as well as from the disruption or misdirection of the services they provide. In today's connected world, it is absolutely critical that organisations are aware of the importance of Cyber Security and how it can assist in the protection of sensitive and mission critical data. We offer Cyber Security services, in partnership with some of our esteemed partners in the field. Our Managing Director is also currently studying for a Certificate in Cyber Security and hopes to impart this knowledge and skill to both our staff and clients.

We are able to provide the following services in this field:

Cryptography	Ethical Hacking	Digital Forensics
Penetration Testing	Network Security Monitoring	Risk Consulting and Advisory
Cloud Security		

16. e-Waste Processing

Electronic Waste (e-waste, e waste, ewaste) encompasses a wide range of discarded electronic devices such as computers, mp3 players, televisions and cell phones. There are various components that make up these devices. We separate them into various categories and recycle them safely and responsibly. E-Waste is a toxic legacy of our digital age. Our waste electronics are polluting drinking water and harming ecosystems around the world. It's time to fix the problem. We need more e-waste repair and refurbishment, worldwide. Mosima IT Solutions has identified e-Waste as a potential revenue stream and we have identified the following services as part of the electronic waste value chain:

Data destruction	E-Waste Pre-processing	E- Waste Collection
Recycling	Warehouse Clearouts	E-Waste Training
Cloud Security		

17. Smart City Solutions

Rapid urbanization has mandated the need for smart city solutions. Our comprehensive suite of smart city solutions ranges from traffic management, energy efficiency to e-governance, intelligent lighting systems, home and building efficiency systems and smart healthcare.

We provide the following smart city solutions:

- Building Plans Information Management Systems – Integrated fully online application for building and planning departments in Municipalities
- SignTrack is a centralised platform for capturing, reporting and managing signage, branding and safety signs for municipalities, SOEs and corporates who have a vast network of signage sites.
- Mobile App development for Municipalities.
- Fixa is a platform for reporting and managing municipality infrastructure problems, it provides reporting, analysis and management capabilities. It is mainly aimed at municipalities and seeks to build a constructive partnership with community members and heighten awareness regarding.
